2016 Spotlight on Safety Post-Test

1. Kaiser Permanente’s Mission Statement states: “Kaiser Permanente exists to provide affordable, high quality health care services to improve the health of our members and the communities we serve.
What are the three major components of our Vision that guide our behavior to achieve our Mission?
   a. How we relate to each other
   b. How we work
   c. How we define success
   d. All of the above

2. True or False
   I Care Behaviors begin by taking ownership and choosing my attitude

3. What is a safety observation and why do we have them?
   a. Safety observations are a proactive way to prevent injuries
   b. Observing staff in their natural work environment and having a conversation with employee instantly to prevent injury
   c. Observations are performed in partnership by trained management and labor leaders.
   d. All of the above

4. When do you use the “Safety Check Please” Process
   a. When there is a safety concern
   b. When there is an opportunity to improve current practice
   c. When the RN assesses and determines it is necessary to activate the Lift Team or Team Lift Approach
   d. All the above

5. True or False
   Qualified Bilingual Staff (QBS II) Face to Face interpreters should especially be used when visual cues are important, for sensitive or complex visits, Mental Health services, physical or visual components, or if multiple limited English speaking individuals are present.

6. How can we provide better care to our patients that identify as LGBTIQ (Lesbian, Gay, Bisexual, Transgender, Intersexed, and Questioning)?
   a. Keeping an open mind about the patient’s identity
   b. Don’t be afraid to ask what the patient prefers to be called
   c. Get educated
   d. All of the above

7. What are some examples of events that should be documented by completing an unusual occurrence report (UOR) online (UOR-O)? http://kpnet.kp.org:81/california/qmrs/rm/UORO/index.html
   a. Medication ADR (Adverse Drug Reaction)
   b. Environmental injuries
   c. Falls
   d. Injuries related to equipment
   e. Issues related to patient hand-offs, and criminal and behavioral issues related to patient care
   f. All of the above

8. If your patient is exhibiting these symptoms: slurred speech, facial droop, and/or weakness of an arm or leg especially on one side of body what number do you call in the inpatient setting?
   a. Code stroke ext. 300
   b. 911

9. True or False
   Staff in outlying clinics and medical office buildings call 911, if they have a patient or member with stroke symptoms.
2016 Spotlight on Safety Post-Test

10. Strategies to prevent avoidable Hypoglycemic Events when diabetic patients are admitted to the hospital include:
   a. Assessing diet and document percentage of meals and snacks consumed
   b. Assessing patients who are NPO for possible need of IV fluids with Dextrose
   c. Assessing diabetes medications regarding onset, peak, and duration of action
   d. All of above

11. To call an Emergency Code on the Moreno Valley Medical Center Campus dial ext. 300

Match the codes below
   b. Code Orange ____ Infant Security System
   c. Code Blue    ____ Cardiac or Respiratory Arrest, (baby up to 15lbs)
   d. Code Grey    ____ Cardiac or Respiratory Arrest, (over 13yrs)
   e. Code Pink    ____ Fire
   f. Code Secure  ____ Cardiac or Respiratory Arrest, (baby, 16lbs-13yrs)
   g. Pediatric Code blue  ____ Internal or External Disaster
   h. Code Silver  ____ Weapon/Hostage Situation
   i. Code stroke ___ BE FAST symptoms

12. The Safety Hot-Line number for Moreno Valley Medical Center is:
   a. 7777
   b. 6600
   c. 0 (Operator)
   d. 1234

13. All KP facilities have implemented a hazardous energy control program to prevent injury to employees. This program is known as:
   a. Lockout /Tagout
   b. Blackout

14. Lockout is a physical lock that:
   a. Holds a switch in the off position
   b. Shuts a valve for maintenance
   c. Stops hazardous energy from being released
   d. All of the above

15. Tagout is:
   a. A paper or plastic tag placed on a breaker/switch or valve as a warning not to operate it
   b. Used when Lockout cannot be used
   c. Not to be removed or bypassed for any reason
   d. All of the above

16. True or False
   If you routinely work with radioactive material or radiation sources, you may be exposed to low levels of radiation. These low levels are measured with personal dosimeters and are reviewed by the Radiation Safety Officer.

17. Physician Orders for Life Sustaining Treatment (POLST) is a:
   a. Physician Order recognized throughout the medical system in California
   b. Directive for a range of end-of-life medical treatment
   c. Portable document that transfers with the patient throughout the medical system
   d. All of the above
18. Annual Health Evaluation includes:
   a. Annual questionnaire
   b. Current on mandated vaccines
   c. TB skin test
   d. N95 Fit test for areas that require it
   e. Annual review of infection control practices and complete a post test
   f. All of the above

19. Personal protective equipment (PPE) may include:
   a. Gloves
   b. Gowns
   c. Masks
   d. Protective eyewear/ Face shields
   e. All of above

20. According to the World Health Organization (WHO) guidelines, Hand Hygiene needs to be performed:
   a. Before and after patient contact
   b. Before performing an aseptic task
   c. After exposure to blood and/or body fluids
   d. After contact with patient surroundings
   e. After contact with Patient environment (surfaces, equipment)
   f. All of the above
