

NOVA STATSTRIP ACCESS INSTRUCTIONS FOR FACULTY

1. Instructors who have not been trained on the NovaStatStrip machine, please contact **Dennis Edora** at 310-257-6334, or Dennis.S.Edora@kp.org to get “Super User” training.
2. Once instructors have been trained and validated as “Super Users”, they will train their students on the Nova StatStrip machine using the machines on the unit of their clinical rotation. Instructors will complete the "Training and Competency Record POCT Glucose Testing Using NOVA StatStrip" form for each of their students, and will fax copies to **Dennis Edora**. Original documents will be turned in to the Educator of the Unit.
3. Instructors who have been trained, need to complete their competency 6 months from the initial training and annually thereafter. Instructors will have access to the meters until the end of the rotation. When an instructor comes back for another rotation, and uses a glucose meter, the meter will give an alert message if the instructor’s competencies are due. The quizzes for the competency will be on the meter. The instructor will need to take the quiz and pass. If the instructor does not pass the quiz, he or she will not get access to the meter, and needs to contact **Dennis Edora**.
